SUMMARY

Mid-Senior Frontend Engineer with 4+ years shipping scalable FinTech and consumer web/mobile products and maintaining 99.9% system uptime. Expert in architecting robust, accessible interfaces, optimizing complex state management, and driving developer efficiency using React, TypeScript, and React Native. Committed to delivering enterprise-grade software through rigorous testing, CI/CD, and cloud-native best practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3.
Frameworks & Libraries: React.js, Next.js, React Native, Express.js, Nest.js, Mongoose.
Databases: MongoDB (NoSQL), PostgreSQL (Relational).
Tools & DevOps: Git/GitHub, CI/CD Pipelines, Sentry, Jira, Azure, Figma, Expo EAS.
API Integrations: RESTful APIs, Stripe (Payments), Firebase, Third-Party Integrations, WebSockets.
Methodologies: Agile, Scrum, SDLC, TDD (Test Driven Development), OOP, Component-Driven Development.

EXPERIENCE

Materia Technica I.K.E. | Software Engineer (Contract) | July 2026 – Present

- Engaged as an independent contractor to provide software development and related engineering services remotely for Materia Technica I.K.E., a Greece-based private company.
- Deliver frontend and fullstack features across the product, translating requirements into clean, well-tested, production-ready code.
- Collaborate directly with the company's manager and cross-functional stakeholders to plan, scope, and prioritize engineering work.
- Maintain code quality and consistency through code reviews, documentation, and adherence to agreed engineering standards.

Environment: *React, TypeScript, Next.js, REST APIs, Remote Collaboration Tools.*

Tego | Mobile Application Developer | April 2026 – October 2026

- Developed a cross-platform service-booking mobile application using React Native, Expo, and TypeScript.
- Integrated backend REST APIs and real-time socket services to support app workflows, booking experiences, and data synchronization.
- Implemented reusable UI components and managed application state with Zustand, while integrating image upload functionality.
- Configured EAS build profiles and generated production Android App Bundles, supporting Google Play release preparation and App Store submission workflows.

Environment: *React Native, Expo, TypeScript, Zustand, REST APIs, WebSockets, Cloudinary, EAS Build.*

Orvalon Digital | Fullstack Developer (Frontend-heavy) | January 2026 – August 2026

- Contributed to the frontend development of a digital services platform connecting Nigerian talents with businesses, supporting a growing base of active users.
- Translated complex UI/UX designs into production-ready, pixel-perfect web pages with a strong focus on performance, accessibility, and cross-browser usability.
- Collaborated closely with designers and backend engineers to scope features, refine requirements, and continuously improve overall user experience.
- Contributed to fullstack development tasks including feature implementation, API integration, and bug resolution across the product.
- Participated in code reviews and adopted component-driven development practices, improving code reusability and reducing delivery time for new features.
- Worked within an agile sprint cycle, delivering iterative updates and gathering stakeholder feedback to prioritize the product roadmap.

Environment: *React, Next.js, TypeScript, TailwindCSS, REST APIs.*

LOTUS Bank | Frontend Developer (Contract) | October 2025 – March 2026

- Developed a secure internal admin dashboard for banking operations and customer management, supporting daily operational workflows.
- Built responsive, production-grade UI components with React, TypeScript, TailwindCSS, and Zustand, ensuring consistency across the design system.
- Integrated backend services using REST APIs, ensuring accurate, real-time data synchronization across multiple dashboards.
- Implemented role-based access controls and secure authentication flows to safeguard sensitive banking and customer data.
- Optimized application performance through code splitting and memoization, reducing dashboard load times for internal operations staff.

Environment: *React, TypeScript, TailwindCSS, Zustand, REST APIs, Banking Systems.*

EcoHotels | Frontend Developer | November 2023 – December 2025

- Built user-facing interfaces for a global hotel booking platform using React, Next.js, TypeScript, and Tailwind CSS, serving customers across multiple regions.
- Developed hotel search, booking, and pricing-related features, streamlining the end-to-end reservation experience for users.

Environment: *React, Next.js, TypeScript, Tailwind CSS, REST APIs.*

Coralstone Capital | Frontend Web Developer (Contract) | April 2022 – August 2022

- Led the frontend revamp of the company website, enhancing design and user experience, and translating design concepts into responsive, visually appealing interfaces using Next.js and Tailwind CSS.

Environment: *Next.js, Tailwind CSS, Responsive Design.*

EDUCATION

BSc Systems Engineering University of Lagos

CERTIFICATIONS

JavaScript Algorithms and Data Structures, freeCodeCamp
